Proceedings
4th International Conference on
Concrete Pavement Design and Rehabilitation
April 18-20, 1989
Purdue University
Eldon J. Yoder Outstanding Paper Award

Professor Eldon J. (Eldy) Yoder was born in Goshen, Indiana on December 11, 1918. Eldy received his BS degree in Civil Engineering from Purdue University in 1945, and his MSCE in 1946, majoring in Highway Engineering and minorin in Soil Mechanics and Structures. In 1946, he accepted employment with Ohio State University as an Assistant Professor in Civil Engineering. In 1949, he returned to Purdue as Assistant Professor of Highway Engineering. He was promoted to Associate Professor in 1954 and, in 1962, became Professor of Highway Engineering.

Professor Yoder’s record of educational, technical and professional accomplishments in the field of highway engineering, especially pavement design serves as an inspiration to us all. He was an outstanding teacher, an excellent researcher, and served as an engineering consultant on major highway projects worldwide. He was very active in professional societies, and especially enjoyed the Transportation Research Board. In 1983, he received TRB’s Roy W. Crum Award "in recognition of outstanding achievement in the field of transportation research."

Professor Yoder was very active in the development of continuing education programs in the highway field. He was the organizer of TRB’s First International Conference on Low-Volume Roads in 1975, and served as chairman of the Third conference until his death. He also organized the First and Second International Conferences on Concrete Pavement Design, and was initiating plans for the Third International Conference at the time of his death in 1983. In memory of Eldon J. Yoder and his many contributions to the highway design profession, the Third International Conference was dedicated to him and an award set up in his name for the outstanding paper for each conference. This award will be presented during the conference closing.
Foreword

These are the proceedings for the Fourth International Conference on Concrete Pavement Design and Rehabilitation. This is the fourth in a planned series of such conferences to bring together experts from all over the world to discuss state-of-the-art issues in this subject area. The conference will cover all aspects of the design, evaluation, performance and structural rehabilitation of Portland Cement Concrete pavements, including new and innovative techniques. Papers on bases, joints and drainage will also be presented.

The First International Conference on Concrete Pavement Design was held at Purdue University on February 15-17, 1977. The Second International Conference on Concrete Pavement Design was held in Indianapolis, Indiana on April 14-16, 1981. Both of these conferences were quite successful, thanks to the tireless efforts of their chairman, Eldon J. Yoder, Professor of Civil Engineering at Purdue University. Eldy was very active in planning the Third International Conference until his untimely death in June 1983. The Third Conference was dedicated to his memory and to his many contributions to the engineering profession. It was held on April 23-25, 1985, at Purdue University.

The papers presented in this proceedings were selected from the 111 synopses that were submitted in response to the initial call for papers in January of 1988. The papers selected for presentation at the conference resulted from a two stage review of the synopses and then the papers of the selected synopses. Due to the many fine papers submitted, the Program Committee decided to also publish some of the excellent papers which could not be included in the conference program. The papers published in this proceedings have been organized in the same format as that of the general program as follows:

| Session 1 | Keynote Addresses |
| Session 2A | Design Theories and Performance |
| Session 2B | Rehabilitation |
| Session 3 | Pavement Evaluation and Overlays |
| Session 4A | Pavement Design and Economic Analysis |
| Session 4B | Design and Rehabilitation of Airfields |
| Session 5A | Evaluation and Testing |
| Session 5B | Recycling and Construction |
| Session 6 | Joints, Bases and Drainage |
| Session 7 | Conference Closing |

The format of the conference allows each presenter to make a formal presentation of his paper, followed by time for questions from the audience and responses by the authors. Interaction between authors and attendees will be encouraged throughout the conference.

The compilation of this proceedings and the conference program would not have been possible without the generous efforts of the members of the Program Committee in reviewing and selecting the final papers and presentations. The Program Committee members are identified on the next page. Special thanks are expressed to the Federal Highway Administration for its financial assistance in publishing this preprint, and in setting up the final program. Finally, the efforts and cooperation of the authors of the papers in this proceedings are deeply appreciated. These efforts have enabled us to publish a quality document that will constitute an excellent reference tool for engineers engaged in highway design, construction and maintenance for many years to come.

Charles F. Scholer and Thomas D. White, Conference Co-Chairmen
School of Civil Engineering
Purdue University
West Lafayette, Indiana 47907 U.S.A.
Program Committee

Michael Darter (University of Illinois)
Ralph Duncan (Illinois Department of Transportation)
John P. Hallin (Federal Highway Administration)
Col. Lawrence D. Hokanson (U.S. Air Force Engineering and Services Center)
Michael P. Jones (Navy Facilities Engineering Command)
Walter Kilareski (Pennsylvania State University)
Melvin Larsen (Illinois Concrete Council)
Roger Larson (Federal Highway Administration)
Richard A. McComb (Federal Highway Administration)
B. Frank McCullough (The Center for Transportation Research)
Theodore L. Neff (Concrete Reinforcing Steel Institute)
Paul Owens (Indiana Department of Highways)
Robert G. Packard (Portland Cement Association)
William A. Phang (Pavement Management Systems)
Gordon K. Ray (Concrete Pavement Consultant)
John L. Rice (Federal Aviation Administration)
George W. (Pat) Ring (Transportation Research Board)
Ray Rollings (U.S. Army Corps of Engineers, Waterways Experiment Station)
Charles F. Scholer (Purdue University)
Thomas D. White (Purdue University)
William A. Yrjanson (American Concrete Pavement Association)

The papers presented in this proceedings have been reproduced photographically from copy furnished by the authors. The contents of the papers reflect the sole views of the authors. In some cases, the material for the papers was obtained under contract with the Federal Highway Administration and various State Highway Departments. The material does not reflect the views of the Federal Highway Administration or those of the other sponsoring agencies.
The Fourth International Conference on Concrete Pavement Design and Rehabilitation has been made possible by the cooperation of various organizations in the United States and other countries. The conference has been planned by a Program Committee representing the following agencies:

**Sponsors:**

- Purdue School of Civil Engineering
- Federal Highway Administration
- Portland Cement Association
- Transportation Research Board
- Indiana Department of Highways
- Federal Aviation Administration
- U.S. Air Force Engineering and Services Center

**Supporting Agencies:**

- American Concrete Institute
- American Concrete Pavement Association
- American Road and Transportation Builders Association
- American Society of Civil Engineers
- Cembureau (European Cement Association)
- Concrete Reinforcing Steel Institute
- International Road Federation
- Permanent International Association of Road Congresses (PIARC), Technical Committee on Concrete Roads
- Roads and Transportation Association of Canada
- U.S. Army Corps of Engineers, Waterways Experiment Station
- U.S. Naval Facilities Engineering Command
- Wire Reinforcement Institute
# Table of Contents

Eldon J. Yoder Outstanding Paper Award ........................................ ii
Foreword ........................................................................ iii
Program Committee ............................................................. iv
Sponsors and Supporting Agencies .................................................. v

## Session 1: Keynote Addresses

(These papers will be presented at the Conference, but do not appear in the proceedings)

*The European Experience: Summary of the Workshop on Theoretical Design of Concrete Pavements, Held June 5-6, 1986 in EPEN, The Netherlands* — **Jan J. M. van der Vring**, Centre for Research and Contract Standardization in Civil and Traffic Engineering, Ede, The Netherlands (former secretary of the Workshop on Theoretical Design of Concrete Pavements)

## Session 2A: Design Theories and Performance

*Subbase Friction Effects on Concrete Pavements* — **Andrew J. Wimsatt** and **B. Frank McCullough**, Center for Transportation Research, The University of Texas at Austin .................. 3

*Effect of Coarse Aggregates on the Design and Performance of CRCP in Texas* — **B. Frank McCullough** and **C. L. Saraf**, Center for Transportation Research, The University of Texas at Austin .................................................. 45

*Concrete Pavement Design Procedure for Container Terminals* — **Xiaoping Shi** and **Zukang Yao**, Tongji University, Peoples Republic of China ............................... 53

*A Mechanistic Based Design Procedure for Jointed Concrete Pavements* — **D. G. Zollinger**, Texas A&M University and **E. J. Barenberg**, University of Illinois ............................... 75

*Improved Pavement Design Through Pavement Instrumentation* — **James K. Cable**, Iowa State University............................................................. 99
Session 2B: Rehabilitation

Pavement Rehabilitation in an Urban Environment: Minnesota Repair Standards
Rehabilitate Twin Cities Freeways — Terry Zoller, Joel Williams and Dan Frentress,
Concrete Paving Association of Minnesota (This paper pertains to Rehabilitation but
was presented in the Closing Session) ................................................................. 111

Restoration of Surface Properties of Concrete Pavements: Overview of Practices and
Assessment in France — J. P. Chirstory, Laboratoire Régional de L'Ouest Parisien, A.
Corboeuf, Société des Autoroutes, J. L. Nissoux, Laboratoire Central des Ponts et
Chaussées, and F. Verhee, Service d'Etudes Techniques des Routes et Autoroutes ... 117

Analysis of Full-Depth PCC Patches for Jointed Concrete Pavements — Walter P.
Kilareski and Taghi E. Ozbeksi, Pennsylvania State University ................................ 125

Nationwide Performance of Concrete Pavement Rehabilitation — Kathleen T. Hall,
Michael I. Darter, Mark B. Snyder and Samuel H. Carpenter, University of Illinois at
Urbana-Champaign, and Stephen W. Forster, Federal Highway Administration,
Washington, D.C. ........................................................................................................ 137

Rapid Rehabilitation Techniques with Cement Concrete Applied to Combatting Rutting
and Rippling in Flexible Pavements — Ing. R. van Wijk, Public Works Department, Ir.
D. Stoelhorst, Bruil-Arnhem-groep, and F. Smits, Cobeton, Netherlands .................. 151

Development of Lift-Up Method for Rehabilitation of Settled Prestressed Concrete
Pavements — Katsuhisa Sato, Yoshitaka Hachiya, Port and Harbour Research
Institute, Ministry of Transport, and Haruo Inukai, P.S. Concrete Company Ltd., Japan ... 159

Economic Evaluation of Concrete Pavement Rehabilitation — Daren L. Coudriet,
David R. Luhr, Keystone Management Systems, and Walter P. Kilareski,
Pennsylvania State University ................................................................................. 171

Session 3: Pavement Evaluation and Overlays

Cement Concrete Overlays on Flexible Pavements in France — Yves Charonnat,
Laboratoire Central des Ponts et Chaussées, Jean Chauchot, Gailledrat Company,
Alain Sainton, Beugnet Company, François Verhee, Service des Etudes Techniques
des Routes et Autoroutes, France ............................................................................ 185

Introduction of Recent Thin Bonded Concrete Overlay Construction and Evaluation of
Those Performances in Japan — Shiro Ibukiyama, Shuichi Kokubun, and Ken
Ishikawa, Ohbayashi Road Construction Co., Ltd., Japan ........................................ 193

Thin Overlays of Steel Fiber Reinforced Concrete and Continuously Reinforced
Concrete: State of the Art in Belgium — Karel Verhoeven, Centre National de
Recherches Scientifiques et Techniques pour l'Industrie Cimentière - Brussels, Belgium .... 205

De-lamination in Bonded Concrete Overlays of Continuously Reinforced Pavement —
James R. Lundy and B. Frank McCullough, Center for Transportation Research, The
University of Texas at Austin .................................................................................. 221

Interpretation of Falling Weight Deflectometer Results Using Principles of Dimensional
Analysis Anastasios M. Ioannides, Ernest J. Barenberg, University of Illinois, and Jo
A. Lary, Pavement Consultants, Inc., Seattle, Washington ...................................... 231
Session 4A: Pavement Design and Economic Analysis

Thickness Design of Concrete Pavements by Probabilistic Method — Yang H. Huang and Gary W. Sharpe, University of Kentucky ................................................................. 251

Rigid Pavement Design for Roads and Streets Elastic Layered Method — Yu. T. Chou, USAE Waterways Experiment Station, Vicksburg, Mississippi ........................................... 267

The Design of Plain Dowelled Jointed Concrete Pavement — Karleen Kelleher and Roger M. Larson, Pavements Division, Federal Highway Administration, Washington, D.C. ........................................................................ 279

Reliability Analysis of China's Highway Concrete Pavement Design Procedure — Guodong Zhang and Zhaohong Zhu, Tongji University, Shanghai, Peoples Republic of China ........................................................................ 293

Experiences and New Developments in Concrete Road Construction in the Federal Republic of Germany — Michael Schmidt, Research Institute of German Cement Works, Düsseldorf, Federal Republic of Germany ......................................................... 301

Incorporation of the 1986 AASHTO Guide into the Concrete Pavement Design Guidelines of the Texas SDHPT — Andrew J. Wimsatt and James L. Brown, Texas State Department of Highways and Public Transportation ........................................ 311

Development and Selection of the Preferred 4R Strategy — Gerald F. Voigt and M. J. Knutson, American Concrete Pavement Association ......................................................... 331

Session 4B: Design and Rehabilitation of Airfields

Evaluation of Strength Tests and Acceptance of Concrete Pavements — Wilbur Charles Greer, Jr., Law Engineering, Inc., Georgia ................................................................. 375

Developments in the Corps of Engineers Rigid Airfield Design Procedures — Raymond S. Rollings, USAE Waterways Experiment Station, Vicksburg Mississippi ......................................................... 405

An Evaluation Procedure for Rigid Airfield Pavements — Albert J. Bush III, USAE Waterways Experiment Station, Vicksburg Mississippi, Randall W. Brown and Charles E. Bailey, USAF Engineering and Services Center (Publish Only) ......................................................... 419

Development of New Design Method for Control of Cracking in Continuously Reinforced Concrete Pavement — Ryoichi Sato, Utsunomiya University, Yoshitaka Hachiya, Port and Harbour Research Institute, Ministry of Transport, and Atsuhito Kawakami, New Tokyo International Airport Authority, Japan (Publish Only) ......................................................... 431
### Session 5A: Evaluation and Testing

**Pavement Performance Analysis of the Illinois Interstate Highway System** — Mark E. Dwiggins and Michael I. Darter, University of Illinois, James P. Hall and James B. DuBoise, Illinois Department of Transportation ........................................ 447

**Long-Term Performance Study of Rigid Pavements** — B. Frank McCullough, Moonchel Won and Kenneth Hankins, Center for Transportation Research, The University of Texas at Austin ................................. 455

**The Performance of Jointed Concrete Pavements as Affected by Factors Other Than Traffic Induced Stress** — Pieter J. Strauss, Bruinette Kruger Stoffberg, Inc., and M. F. Mitchell, Department of Transport, Pretoria, South Africa ............................... 467

**Six Years Experience with Experimental Concrete Pavement Sections in Ontario** — Thomas J. Kazmierowski and Gerry A. Wrong, Highway Design Office, Ministry of Transportation, Province of Ontario, Canada ............................. 473

**An Expanded Evaluation of Arizona’s Ten Mile Concrete Test Roadway** — Paul E. Mueller, Center for Advanced Research in Transportation, and Larry Scofield, Arizona Transportation Research Center ................................................... 491

**Fatigue Strength of Roller Compacted Concrete** — Jorge Gomez, Universidad Autonoma del Estado de Mexico, and Charles F. Scholer, Purdue University ............... 505

**Accelerated Strength Tests for Quality Control of Concrete Pavements** — Jeffrey P. Armstrong, USAE Waterways Experiment Station, Vicksburg, Mississippi (Publish Only) ............................ 519

**Development of a Long-Term Monitoring System for Texas CRC Pavement Network Utilizing Experimental Design** — Chia-pei Chou and B. Frank McCullough, Center for Transportation Research, The University of Texas at Austin (Publish Only) ................................. 531

**Florida Econcrete Test Road: A 10-Year Progress Report** — Torbjorn J. Larsen and Jamshid M. Armaghani, Florida Department of Transportation (Publish Only) ............................... 547

### Session 5B: Recycling and Construction

**Fast Track Paving: Meeting the Need for Early Opening of Pavement** — Gerald W. Chase, Iowa State University, John Lane, Iowa Department of Transportation, Gordon Smith, Iowa Concrete Paving Association ................................. 579

**RCC Pavements in Spain** — Carlos Jofre, Alejandro Josa, Rafael Fernandez, Instituto Espanol del Cemento y Sus Aplicaciones, and Carlos Kraemer, Universidad Politecnica de Madrid, Spain ............................. 587

**Measuring the Smoothness of Newly Constructed Concrete Pavement for Acceptance Specifications** — Rob Harrison, Carl Bertrand and W. R. Hudson, Center for Transportation Research, The University of Texas at Austin ................................. 601

**An Experiment with Porous Concrete Top Layer on J.C.P.** — G. H. Kellersmann, Public Works, Amsterdam, and F. Smits, COBETON, Netherlands .......................... 615
Session 6: Joints, Bases and Drainage

Permeable Base Design and Construction — Daniel M. Mathis, Federal Highway Administration, Washington, D.C. ................................................. 663

Faulting Evolution in Undoweled PCC Pavements with Slabs Curled Upwards — M. Poblete, R Valenzuela, E. Clasing, Universidad De Chile, J. Salgado and P. Gutierrez, Ministerio de Obras Publicas de Chile .......................... 671

Performance of Concrete Pavement with Econcrete Base — Shie-Shin Wu and Thomas M. Hearne, Jr., North Carolina Department of Transportation .......................... 683

Preliminary Evaluation of Procedures for the Assessment of Load Transfer Across Joints and Cracks in Rigid Pavements Using the Falling Weight Deflectometer — Emmanuel B. Owusu-Antwi, Alvin H. Meyer, and W. R. Hudson, Center for Transportation Research, The University of Texas at Austin .............................. 697

Load Transfer Restoration at Joints — J. P. Christory, Laboratoire Regional de l'Ouest Parisien, J. L. Missieux, Laboratoire Central des Ponts et Chaussées, P. Orsat, Société Freyssinet International and F. Verhee, Service d'Etudes des Routes et Autoroutes, France ........................................................................ 709

Combatting Concrete Pavement Slab Pumping: State of the Art and Recommendations — Michel Ray and Jean-Pierre Christory, P.I.A.R.C. Technical Committee on Concrete Roads, France ............................................ 725

A Refined Model of Doweled Joints for Concrete Pavement using FEM Analysis — T. Nishizawa, Ishikawa College of Technology, T. Fukuda, Tohoku University, and S. Matsuno, Sato Road Company, Japan (Publish Only) ............................... 735

Session 7: Conference Closing

(This paper will be presented at the Conference, but does not appear in the proceedings)

Prospects for Concrete Pavements in Developing Countries — Asif Faiz, Transport Operations Advisor, The World Bank, Washington D.C.
